"THE WORLD IS A BOOK, AND THOSE WHO DO NOT TRAVEL READ ONLY A PAGE."
— Saint Augustine
YOU WILL FIND THEM IN EVERY CORNER OF OUR COUNTRY. EVERYDAY PEOPLE WHO REFUSE TO LIVE BY HALF MEASURES. THE ONES WHO GO ALL IN — NOT FOR FAME OR GLORY, BUT BECAUSE THEY JUST LOVE DOING WHAT THEY DO. THEY GIVE IT EVERYTHING, AND INSPIRE US TO DO THE SAME. IN THIS SPIRIT, WE CREATED THE 2020 TELLURIDE, AN ALL-NEW SUV DESIGNED WITH GUTS AND GRACE, ASSEMBLED IN AMERICA! AND EQUIPPED TO LET YOU PURSUE WHAT THRILLS YOU — ON ANY ROAD YOU CHOOSE.

†Telluride is assembled in the United States from U.S. and Foreign parts. See BBSRinfoTREASUREMOUNTAIN.com.
THE ORIGINAL THRILL-SEEKERS: TELLURIDE’S FIRST MINERS

In 1875, a prospector named John Fallon staked the first claim in Telluride’s remote gold and silver-filled mountains. An excited wave of fortune-seekers flooded to the area from every direction — braving an arduous journey over rugged terrain, brush-filled trails, and the sky-high elevations of the Colorado Rockies. Beating paths to reach the “City of Gold” led to claims of their own. Telluride was soon a mining boomtown, bringing throngs of adventurers to this new, rugged community, and spirited residents. Over the next century, Telluride rode the ups and downs of commodity prices, and eventually peace, as mining residents found that their mountain town was home to another sort of “white gold” — snow. With its incredible snow for skiing, Telluride became a haven for those who love adventure, and a hub to an ever more Telluride.

TELLURIDE, CO

Legend has it that Telluride got its name from the mineral tellurium, a non-metallic element associated with mineral deposits of gold that were found in Colorado’s precious metal-filled mountains. Today, Telluride is best known for its “white gold” — snow — making it perfect for those who love adventure, and an engine in an ever more Telluride.

WHAT’S YOUR ADVENTURE?

Wherever the road calls you, Telluride is equipped to take you there — whether it’s mountains covered in fresh snow, a remote desert escape, or perhaps some intriguing — no set destination at all. Like its namesake town of today and the legacy of its founding residents, the Kia Telluride is built for thrilling endeavors, rugged conditions, and an innate pull toward the exciting — with available Active On-Demand AWD, 2.0L power, advanced technology, and modern luxury.

† No system, no matter how advanced, can compensate for all driver errors, driving conditions, accidents, and/or injury. Always drive safely and obey all traffic laws. Aftermarket snow tires (sold separately) are recommended for snowy or icy conditions. Always drive safely and use caution. SX SHOWN.
BECAUSE THERE’S A SNOW MODE IN ALL OF US.

When fresh snow beckons, Telluride’s available ACTIVE ON-DEMAND AWD† system is ready for challenging road conditions. The system is designed to actively distribute torque between the front and rear wheels to help improve performance depending on the driving situation, and features two custom modes: SNOW MODE† is engineered to help reduce wheelspin and give you enhanced control in snow. And AWD LOCK† mode gives you full-time all-wheel drive at the touch of a button to help conquer sand, mud, and other difficult terrain that dares to stand between you and your destination.
HERE’S WHY THE “S” STANDS FOR SPORT.

While you may not happen upon a racetrack, at some point in your travels you’ll likely encounter a nice, curvy road, mountain pass, or wide-open stretch of highway. This is your chance to experience the impressive level of “sport” in this sport utility vehicle, courtesy of Telluride’s 291-HORSEPOWER, 3.8L GASOLINE DIRECT INJECTION (GDI) V6 ENGINE, ultra-responsive performance, and a host of handling features that have been engineered for a thrilling drive.

SELF-LEVELING REAR SUSPENSION 
Is designed to automatically calibrate the weight load in heavy, uneven payloads, and adjust the height accordingly — helping to keep the vehicle level and balanced for better traction and handling.

TORQUE VECTORING CORNER CONTROL (TVCC) 
Is designed to increase cornering stability by applying braking force to the rear inside corner ahead for more precise turning in a variety of situations.

A-SPEED AUTOMATIC TRANSMISSION 
Gives you a greater range of gears for seamless acceleration — along with Sportmatic shifting for a sportier, more-engaged driving experience.

MULTIPLE DRIVE MODES 
Include a Sport mode that adjusts the settings for powertrain, drivetrain, and steering effort to provide an optimal driving experience.

ISO-STRUCTURE™ CONSTRUCTION 
Made from 59% advanced, high-strength steel, ISO-STRUCTURE™ is stronger and lighter than regular steel, providing enhanced rigidity, body control, and a quiet ride.
MADE FOR THOSE MOMENTS WHEN SOMEONE SAYS, “LET’S CHECK IT OUT OVER THERE.”

You can follow your urge to explore with the confidence in knowing that Telluride excelled in RUGGED CAPABILITY TESTING at Kia’s high-desert proving grounds. Water, grit, temperature extremes, steep roads, choppy roads, slick roads—no name it, Telluride has been subjected to it.

---

MADE FOR THOSE MOMENTS WHEN SOMEONE SAYS, “LET’S CHECK IT OUT OVER THERE.”

You can follow your urge to explore with the confidence in knowing that Telluride excelled in RUGGED CAPABILITY TESTING at Kia’s high-desert proving grounds. Water, grit, temperature extremes, steep roads, choppy roads, slick roads—no name it, Telluride has been subjected to it.
MY GOAL IS TO CREATE A BEAUTIFUL PIECE OF ART THAT IS MEANT TO BE USED. — Dan Bitterman, Cascadian Canoe Works

FUNCTIONAL BEAUTY. Though craftsmanship takes many forms, we can agree it shares a few common traits: a beautiful, intelligent design; quality materials; meticulous attention to detail; and pride in the end result. This was the high bar we set in designing Telluride’s cabin. We chose premium seating materials like available NAPPA LEATHER TRIM* and detailed it with padded, double-stitched quilting. Simulated BRUSHED METAL accents and MATTE-FINISHED WOOD TRIM add modern, elegant ambiance. We covered the surrounding surfaces with soft-touch materials, and put it all together in a thoughtfully ERGONOMIC DESIGN. The level of craftsmanship is similar to one of Dan’s canoes: you can sense it, you can feel it, and you know it for sure when you experience how it performs.

DAN BITTERMAN
Dan Bitterman lives on Fidalgo Island in the scenic, lake-filled Pacific Northwest islands region — the perfect location to pursue his passion of hand-crafting gorgeous, custom handstrip performance canoes for his company, Cascadian Canoe Works. With names like “The Shaman” and “The Nomad,” each of Dan’s creations is designed to be a vessel of travel inspiration and a travel mode itself. He’s also passionate about his tools and painstakingly detailed. Dan describes his canoes as “beautiful pieces of art that are meant to be used.” He is obsessive about his process, his materials, and even the tools he works with. You could say he’s the epitome of someone who loves and embraces his craft, lives and breathes his passion. No matter where he is in his workshop, he’s out on a lake, bay, or the Pacific Ocean, paddling toward adventure.

FIDALGO ISLAND, WA
With its pristine lakes and lush forests, it’s no wonder Fidalgo Island is home to artisans who appreciate both beautiful surroundings and a well-crafted means in which to explore them. Inside Telluride®, you’ll find the same level of craftsmanship, as behind the wheel of a Telluride.
WHEN YOU'RE TRAVELING HUNDREDS OF MILES, EVERY INCH MATTERS.

More space to stretch out can transform your entire travel experience, so Telluride’s ultra-comfortable cabin features CLASS-LEADING TOTAL LEGROOM, including impressive legroom in the third row. The cabin is designed with standard 8-PASSENGER SEATING, or if you prefer, available 7-passerenger seating with reclining second-row captain chairs. Plus RECLINING SEATBACKS in the third row for added relaxation on long rides.

†Legroom comparison based on 2019 and available 2020 midsize SUVs as of April 2019. *Optional feature available only on certain trims. See Features page for availability. Simulated screen shown. SX WITH PRESTIGE PACKAGE SHOWN.
DUAL-ZONE AUTOMATIC TEMPERATURE CONTROL* gives driver and front passenger separate controls to maintain their own personal climate zone.

REAR AUTOMATIC TEMPERATURE CONTROLS* let front and rear passengers adjust the temperature.

REAR ROOF-MOUNTED DIFFUSED-AIR VENTS let rear passengers diffuse the air flow to a softer, more indirect output when desired.

WIRELESS SMARTPHONE CHARGER* lets you charge your compatible smartphone in the console storage area for cord-free charging.

REAR OCCUPANT ALERT* uses ultrasonic sensors that are designed to detect children or pets in the second or third row, and give visual and audible alerts if it detects movement inside, before and after the vehicle has been locked.

USB CHARGE PORTS IN EVERY ROW provide easy access for front and rear passengers to charge their devices.

DRIVER TALK* allows the driver’s voice to be played through the rear speakers at the touch of a button, making it easier for second- and third-row passengers to hear.

QUIET MODE TUNES* also tunes the speakers in the second and third rows to accommodate sleeping passengers.

BLUETOOTH® WIRELESS TECHNOLOGY WITH MULTI-POINT CONNECTIVITY* allows two users to be connected at the same time, allowing you to quickly switch over to a different device for music or media streaming.

APPLE CarPlay® & ANDROID AUTO® let you control your compatible smartphone to let you make calls, send texts, or play your favorite apps via voice command, and even control your apps through the touch screen.

“SPEAK UP,” “MY TURN TO CHARGE,” AND OTHER PHRASES WE'RE REMOVING FROM THE ROAD-TRIP LEXICON.

*Optional feature available on certain trim levels. See dealer for availability. 2-5 see last page for endnotes. Simulated screen shown. SX WITH PRESTIGE PACKAGE SHOWN.

DEALER ePROCESS
HARTFORD, CT
For over 300 years, Smith-Worthington Saddlery has made custom products as varied as the places their clients take them—from New England to the California desert.

SMITH-WORTHINGTON SADDLERY
Smith-Worthington Saddlery of Hartford, Connecticut, has been designing and producing custom saddles, bridles, and other equestrian tack since George Washington was president. Renowned for their attention to detail for both horse and rider, and a legacy of traditional materials such as open-grained leather and virgin wool flock stuffing, the company has thrived for over 200 years as much for their quality as for their versatility. In their long and colorful history, they’ve designed and produced saddles for the U.S. Cavalry, for Barnum & Bailey’s famous circus wagons, and even dog harnesses for treks to Antarctica. With their deep knowledge, creativity, versatility, and skilled craftsmanship, it’s no wonder the family-run business is still going strong—and their products can be spotted across the country and beyond.

“WE’VE DONE IT ALL. YOU COULD SAY OUR VERSATILITY IS WHAT’S KEPT US GOING ALL THESE YEARS.” — Curtis Hanks, Smith-Worthington Saddlery

UP FOR ANYTHING. Helping you go where you want to go, do what you want to do, and bring what you’ll need when you get there is the mission of Telluride’s versatile cargo design. The available SMART POWER LIFTGATE* operates automatically when you stand behind it, and can be customized to your preferred height and speed program—perfect for when your arms are full. The liftgate’s wide opening makes it easy to load and unload your gear, while MULTIPLE CARGO CONFIGURATIONS accommodate large, bulky items, from riding gear to camping gear. Like Smith-Worthington Saddlery, it’s all about meeting your needs.
When you’re ready to pack up and go, Telluride’s second-row seats FOLD FLAT AT THE TOUCH OF A BUTTON to provide abundant cargo space. With the seats in their upright position, rear passengers can easily get in and out of the vehicle thanks to a wide step, enlarged walk-in space, and ONE-TOUCH SLIDE-AND-FOLD feature, which slides and folds the second-row seat forward to give third-row passengers easy access.

All cargo should be evenly distributed, properly secured, and never piled higher than the seatback. SX WITH PRESTIGE PACKAGE SHOWN

VASTNESS: A CONCEPT AS APPEALING INSIDE AS IT IS OUTSIDE.

CONCEALED UNDER-FLOOR STORAGE beneath the closed luggage board provides a hidden, sunken storage compartment to organize smaller, lesser-used items.

2-WAY LUGGAGE BOARD can be opened to increase the storage area depth for storing taller items like luggage or sporting gear, or closed to create a flat storage area that aligns with the rear seats in their folded-down position.

BRING WHAT YOU NEED. DO WHAT YOU LOVE.

Horses, boat, travel trailer—of course you want to bring them with you, so Telluride is up to the task. Its 295-hp, 3.8L V6 engine puts out a capable 262 lb.-ft. of torque to provide up to 5,000 LB. OF TOWING CAPACITY, allowing you to haul a variety of trailers.
ON TURNING A ROUGH PATCH INTO RECREATION.

Should the road become rocky, Telluride is ready. Its body frame is constructed with RING-SHAPED REINFORCEMENTS around the B and D pillars, for enhanced torsional stiffness and STRUCTURAL STABILITY — which translates to greater control and confidence tackling rugged terrain. Telluride also features HILL-START ASSIST CONTROL (HAC)† designed to automatically hold the brake pressure for two seconds after you take your foot off the brake pedal when starting on a steep hill. And DOWNHILL BRAKE CONTROL (DBC)† which helps you maintain the speed you want on steep downhills, reducing the need to frequently cycle between braking and accelerating.
HOLD ME TO A HIGHER STANDARD.
I’LL MEET YOU THERE.” — Shani Gandhi, music producer and engineer

SHANI GANDHI
Shani Gandhi is an award-winning music producer and engineer in Nashville, known for her work with top artists in the Americana and folk genres. Originally from Singapore and raised in Australia, Gandhi had an analytical, science-focused upbringing, and assumed she would continue down a conventional career path — though she always had a strong passion for music, she considered it a “hobby.” It wasn’t until she learned about the engineering side of music that all the pieces came together. As Shani describes it, “I soon found out that there was a technical side to music. I realized I could take my hobby and my scientific background and build a career from it.”

NASHVILLE, TN
The music industry is the beating heart of Nashville, earning it the nickname “Music City” and attracting top talent in audio and technology, like Shani. Telluride shares this passion of blending a high level of technology into its audio, as well as its communications and driver-assistance features.

“HOLD ME TO A HIGHER STANDARD.
I’LL MEET YOU THERE.” — Shani Gandhi, music producer and engineer

ADVANCED TECHNOLOGY is the soul of Telluride, enhancing everything from the music that provides the soundtrack to your travels, to advanced modern features and state-of-the-art driver-assistance functions. We’re proud to offer an available 10-speaker HARMAN KARDON® 630-WATT PREMIUM AUDIO SYSTEM™ that includes both QuantumLogic™ surround sound and CLARIFI™ — an intelligent, real-time music-restoration technology that restores the crisp, dynamic sound of music that gets lost during the digital audio compression process.

Together with the advanced technologies you’ll find on the following pages, we’re confident they’ll meet your own high standard of approval.
DESIGNED TO LOOK OUT, SPEAK UP, AND EVEN STEP IN.

Even the best drivers can’t be perfect 100% of the time, so we created Kia Drive Wise, a suite of advanced driver-assistance technologies. These include an available SURROUND VIEW MONITOR WITH 10.25" SCREEN, which uses four cameras to provide an aerial view around the vehicle to help when parking in tight spots; REAR CROSS-TRAFFIC COLLISION-AVOIDANCE ASSIST, which uses visual and audible alerts that can help warn of traffic the system detects coming from either side when you’re in reverse, and can even automatically apply the brakes in some cases; and REAR AND AVAILABLE FRONT PARKING DISTANCE WARNING, which is designed to give an audible warning if it detects certain objects close to your vehicle when parking.

THINGS YOU CAN DO REMOTELY FROM YOUR SMARTPHONE:

REMOTE LOCK/UNLOCK/START: lets you lock or unlock the doors or start the engine from afar.
REMOTE CLIMATE CONTROL: lets you get the air conditioning or heater started to preheat or precool the cabin (available on EX and SX)
REMOTE REAR OCCUPANCY ALERT: can send push notification alerts if movement is detected inside the vehicle
REMOTE FIND MY CAR: can locate where you parked your Telluride, and even give you directions to it
REMOTE ACCESS VIA YOUR SMARTPHONE: UVO link is Kia’s smart connectivity system that lets you integrate your compatible smartphone via an embedded modem to perform an array of impressive functions. Just activate UVO link and download the Kia Access with UVO app from the App Store or Google Play Store. We’ll even cover your subscription fees for one year from the original retail purchase/lease date.
Staying can be as high performance as going, thanks to Telluride’s standard advanced systems. These include FORWARD COLLISION WARNING, designed to help detect slowing or stopped traffic ahead, and alert you if it detects you getting too close. And FORWARD COLLISION-AVOIDANCE ASSIST WITH PEDESTRIAN DETECTION, which is designed to help detect and alert you of a collision risk or pedestrian approaching, and even automatically apply the brakes in some cases.
EXTRA HELP WHERE YOU NEED IT.

THE SECRETS TO STAYING CENTERED.

Telluride's advanced technologies include BLIND-SPOT COLLISION AVOIDANCE ASSIST™, which uses radar to help detect and alert you to vehicles in your blind spot, and even apply corrective braking to help you avoid some hazardous lane-change decisions. LANE DEPARTURE WARNING™ can help alert you with a warning beep if the system detects you drifting too close to lane markers without signaling. If you fail to respond to the warning, LANE KEEPING ASSIST™ is designed to detect the vehicle getting close to lane markers, and can apply steering input to help prevent you from drifting into another lane. SMART CRUISE CONTROL WITH STOP & GO™ is designed to help maintain a predetermined distance from the vehicle detected ahead of you. LANE FOLLOWING ASSIST™ can provide a degree of automatic steering control in certain circumstances during Smart Cruise Control operation based on analyzing lane markings and radar-based front-vehicle information that it detects. Finally, HIGHWAY DRIVING ASSIST™ is designed to automatically adjust the speed based on the speed limit of selected federal highways detected through the available Navigation system.12*

HEAD-UP DISPLAY™ projects a color readout of important info onto the windshield to help keep your eyes forward.

DRIVER ATTENTION WARNING™ is designed to give you a warning if the system determines it detects inattentive driving practices.

BLIND-SPOT VIEW MONITOR™ activates within the instrument panel when you turn on the blinker to change lanes, displaying the blind spot in the direction your turn signal is indicating.
WEST POINT, GEORGIA: A SMALL TOWN DOING BIG THINGS.

Chances are, you’ve never heard of WEST POINT. To be honest, we hadn’t either, at least not when we began searching for a location for our first U.S. manufacturing facility. But there was something about the people of West Point that made a lasting impression. For around 150 years, West Point had been the hub of a thriving textile industry. But after the decline of textile manufacturing in the late 1990s, this COMMUNITY OF HIGHLY SKILLED CRAFTSPeople, factory workers, and technicians was looking for a new challenge, an opportunity to re-channel its immense talent and unstoppable spirit. It was as if Kia and the people of West Point were destined to join forces to do something amazing. By 2006, our plan was formed; a 2,200-acre state-of-the-art manufacturing and training facility followed, and along the way, A NEW KIA FAMILY WAS BORN—a now around 14,000 members strong, including plant workers and suppliers. Our first vehicle came off the line here in 2009, and since then, more than 2.6 million Kias have been assembled, including Tellurides. The people of West Point may not be known for who they are— but in what they do, in every Kia they build, they give it everything.
**FEATURES**

**MECHANICAL & EXTERIOR**

- 3.8L Gasoline Direct Injection (GDI) V6 engine
- 8-speed automatic transmission
- Active On-Demand AWD w/ Snow & Max Torque Mode
- Drive Mode Select
- Electronic Parking Brake
- 20-inch alloy wheels w/black finish
- 20-inch alloy wheels w/machine finish
- 18-inch alloy wheels
- 18.8 cu. ft. maximum cargo capacity (FWD)
- 172.0 cu. ft. maximum cargo capacity (AWD)
- 114.2 in. wheelbase
- 267.0 in. overall length
- 67.6 in. (Rear) w/roof rails
- 68.9 in. (Rear) w/o roof rails
- 110-Volt Inverter
- Premium cloth headliner & pillars

**INTERIOR & CONVENIENCE**

- UVO® Connect
- Android Auto® / Apple CarPlay®
- Surround View Monitor
- Lane Departure Warning (LDW)
- Lane Keeping Assist (LKA)
- Blind-Spot View Monitor
- Driver Attention Warning (DAW)

**KIA DRIVEWISE™**

- Blind-Spot Collision-Avoidance Assist
- Forward Collision-Avoidance Assist (FCA) w/Pedestrian Detection
- Highway Driving Assist (HDA)
- Lane Departure Warning
- Lane Keeping Assist
- Parking Distance Warning – Reverse
- Parking Guidance – Reverse

**SEATING & TRIM**

- Split-folding 2nd-row captain chairs
- Split-folding 2nd-row bench
- 60/40 split-folding 3rd-row seats
- Ventilated front seats
- Heated front seats
- 12-way power-adjustable driver’s seat
- 8-passenger seating w/50/50 remote split-folding 2nd-row seats
- 7-passenger seating w/60/40 remote split-folding 3rd-row seats

**TIRES & BRAKES**

- 245/60R18 (LX, EX)
- 245/50R20 (S, SX)
- 255/60R18 (S)
- 265/50R20 (SX)
- 265/45R20 (S"
